Data Cap ⁵	4GB Total	4GB Total	4GB Total
Network			verizon 

* - Does not include taxes or regulatory charges

1 - Data sent as part of an MMS message counts towards data usage

2 - Data is defined as the amount of information (measured in Gigabytes/GB) transferred over your cellular network for activities like streaming video/music, browsing, social media, video calls, MMS attachments and app usage, excluding Wi-Fi usage.

3 - Charge shown is for transmission of the message. Associated data counts towards data usage.

4 - Data overage is consumed in increments of 1GB. When you surpass the allowed usage for the given billing cycle, one (1) GB will be added to your bill. If that data is consumed, you will be charged an additional one (1) GB. This continues until your monthly billing cycle cap is reached.

5 - The data cap for each billing cycle is set at 4GB. Should you need more data for that billing cycle, you will need to open a ticket at support@messageus.com. This policy is in place to limit fraud.

	T-Mobile Simple	AT&T Simple	Verizon Simple
